

## Product Support Discontinuation Notice

Issued: Oct 14, 2009

For customers under an annual support agreement, SteelEye provides full support for its products for three years from their General Availability date. This support period is extended in situations where simple upgrade paths do not exist to later versions of SteelEye products.

The table below shows products whose End of Support dates have been set. If these products are deployed within your IT infrastructure, we strongly recommend that you begin planning to upgrade to later versions. You can see these latest versions and their documentation at <http://licensing.steeleye.com/support/docm.php>. If you are using an earlier version than what is listed below, it is no longer supported.

<b>Product</b>	<b>End of Support</b>
LifeKeeper for Linux v6.1	October 31, 2010
LifeKeeper for Linux v6.2	April 30, 2011
LifeKeeper for Linux v6.3	October 31, 2011
